

## Laying the First Brick at Bramley

Barchester Healthcare, the national care provider, marked the start of building at our Bramley Green site in Hampshire.

Mike Parsons, CEO and founder of Barchester Healthcare, toured the Bramley site and together with Martin Smout laid the first brick.

The new care home in Bramley will be home to 77 residents and is set to open in winter 2010. The new care home will meet the demand for high quality nursing and residential services, including dementia care, in the Basingstoke area.
