

3rd New Project Awarded in Chesterfield

We are delighted to announce we have been awarded our 3rd project in Chesterfield.

The new scheme is the design and construction of an £11.4 million new all-seater stadium for League Two club Chesterfield FC, with external works including concourse, car and coach parking, and landscaping.

In addition to the 10,338-seat stadium, features include a boardroom for club use, kitchen and banqueting facilities for the Legends' Club Lounge and Vice President's Club and further bar facilities at the upper-floor level.

The Club will continue to use its existing stadium on the other side of town for the forthcoming 2009/10 season, and will relocate to the new ground in summer 2010.

The new football club is part of a regeneration plan for Chesterfield on the site of a disused glass factory. The development will include a new Tesco superstore and mixed-use business units that will provide a significant boost to the local economy.
