

New Ward Block at Chesterfield Royal Hospital

We are delighted to announce that we have been awarded a second contract for Chesterfield Royal Hospital.

The new £7 million contract is the construction of a three-storey hospital ward extension to provide an additional 96 beds. The new ward block is to be linked to the existing hospital as an extension to existing ward services.

This is Chesterfield Royal Hospital's biggest building project for 25 years and we are delighted to have secured it amid such tough competition. We are developing a good relationship with the hospital and its staff and we hope to be able to build on this in the future.

The work is due to be completed by August 2010.
