

# New Housing Association Framework

We are delighted to announce that we have been appointed as one of six contractors to a four-year Housing Association Framework. Firebird JVC is a legal partnership formed between five of the major community and housing investment businesses in the Yorkshire region. Bradford-based Firebird JVC will be the primary residential development vehicle but it is not known at this stage what the development programme will be for the next four years.

Contracts will be to build modern, high-quality, affordable housing as part of the ongoing regeneration of Bradford and Leeds.

The award is an unknown quantity until details of individual contracts are released but we are very pleased to have won the appointment after a straightforward bid process and we are proud to be playing a key role in the regeneration of West Yorkshire. This is a substantial investment from Firebird JVC that will bring significant benefits to the local economy and could lead to exciting new opportunities in the region.
