

General Works Marks it's 1st Anniversary

We are pleased to announce that General Works, a division of GB Building Solutions Ltd which was set up as part of the NCC Frameworks, is celebrating its first year of operations this month. It was designed to “dovetail” into the existing business and provide an additional and extended service to our clients; by providing a full turnkey package of design, project management and delivery on projects ranging from £2k up to £1m within all construction sectors.

General Works began operating with an initial team of 7 staff members, but steady growth has resulted in a current staff of around 20 full time colleagues, which are supplemented by colleagues on secondment from our Yorkshire region in addition other regions contributing to the IT & other support systems. Martin Hutson, General Manager, is optimistic about the new business stream's future and expects to see the business continue to grow at a sustainable rate. Martin believes that this 1st anniversary is a milestone for General Works and speaking on the occasion he added: “The hard work and expertise of people across the whole of our company from all regions has combined to deliver a successful business model that can be replicated across the whole business. The one team approach and enthusiasm of individuals to overcome difficult systems and delivery issues has been exceptional”

To date 76 projects have been completed, 14 are currently on site and 40 are at design stage contributing around £6m of business to our total company turnover. The 1st Anniversary coincides with the award of a £450k office refurbishment at Wansbeck Square for Northumberland County Council.

If you would like any further information please contact Martin Hutson at the Newcastle office 0191 2159000 or log on to the General Works website www.gb-generalworks.co.uk.
