

Enterprise Day at Northampton School for Boys

Our RMHF site team were recently asked to spend a day talking and presenting to Year 10 & 11 students at the Northampton School for Boys (NSB) about the Construction Industry, as part of their careers week.

The day included a Career Fair involving stalls covering a wide range of careers, a 40 minute presentation on the process and skills that go into constructing a £46 million scheme and the different routes that students can take for entry into the industry.

The team which included GBSB and Oxford Architects, Scott White & Hookins (Structural Engineers), Kershaw (Mechanical Subcontractor), Hulse (Electrical Subcontractor) provided enjoyable and informative workshops in the afternoon allowing interested students to probe into the industry and the different professions available to them enabling them to consider their careers and options for their final years at NSB.

Oxford Architects, Scott White & Hookins and Kershaw designers presenting within student workshops

Not only is such an event good for our business reputation, gaining recognition from the 'Considerate Constructor Scheme' but also gives our staff and our subcontractors a chance to practice presentations.
