

Ivor Goodsite Visits School Local to West End Village Site

We have recently organised a visit with IVOR Goodsite (Considerate Constructor Scheme character) and Lee Broadhurst, West End Village Project Engineer, to Stoke Minster Primary School to talk to the children about the project and the importance of H&S on site.

Lee Broadhurst explained to the children what we are building, the importance of wearing the correct PPE and why building sites are dangerous places to enter unsupervised. Lee

and IVOR did a good job in promoting all that is positive about the UK construction industry to a young and impressionable audience who were very excited by the experience.

A special mention should be made to Mick Edwards, WEV Site Manager, who did a praiseworthy job in 'becoming' IVOR for the day. The pupils, and Teachers alike, enjoyed the animation Mick brought to the character and it was an enjoyable and educational visit for all.

Lynne Willis, Stoke Minster Head Teacher, was thrilled with the reaction from the children and staff at the school...."***I think both the pupils and staff thoroughly enjoyed the whole morning and a big thanks to GB Building and Staffordshire Housing for organising a very educational but enjoyable experience"***

The West End Village (WEV) project is as a new "extra care" housing Village for Stoke town. The scheme is a £16m partnership project comprising 100 apartments with a mix of tenanted and for sale units for the over 55s, with communal facilities comprising restaurant, bar, gym therapy suite and hairdressing salon.

Our West End Village project in Stoke on Trent is currently entering its 32nd week and is due for completion by January 2011.
